

## **MATKO HIRE**

## Plant Risk Assessment – Isuzu Tip Truck 2.3T

Completed by: S	y: Steve Laidlaw, OHS Services : Date: 18 January 2023						
Owner of plant/eq	juipment: Matko l	Hire					
Owner's represen	tative present: C	hris Smith					
Role: Director							
Location address:	: 1101 – 1107 Ra	iglan Parade, Wa	arrnambool Vic	3280			
Plant/Equipment	name: Tip Trucl	k - 2.3 T					
Make/Description	Make/Description: Isuzu						
Serial number: N	A		Date of purch	ase: 2022	2		
Registration Requ	uired: Yes	Registration No	: XV – 48ZT Reg Expiry Date: NA				
Operator's training	g/licence requiren	nents: Must be fu	Illy licenced & c	ompetent	to operate		
Manufacturer's Ha available: Yes	andbook	Location: In cor	on: In company office Maintenance/Service Agreement: Yes				
Servicing company's name: West Coast Service Centre, Warrnambool							
Maintenance Frequency: Serviced every 10,000km							
DATE	DATE DESCRIPTION OF SERVICE						

DATE	DESCRIPTION OF SERVICE
	Records held by servicing company

Is there a documented Safe Operating Procedure? Yes - Manufacturer's Operator's Manual

Noise Assessment completed? No - NA

Date	Level dBA	dBC	Comment
			See manufacturer's information

	CURRENT EMERGENCY SYSTEM
Top flashing beacon & lights	Hazard warning stickers external surfaces & in cabin
Seat belts	Fire extinguisher
Travel alarm & horn	
Reversing lights	

**CURRENT GUARDING** 

Engine & exhaust guarding

POSSIBLE HAZARD TYPES	LIKEL	IHOOD OF	OCCURR	ENCE	POSS	BLE CO	NSEQUE	NCE		<b>RISK RA</b>	TING	
	Highly Unlikely	Unlikely	Likely	Very Likely	Insignificant	Minor Injury	Major Injury	Extreme	Low	Moderate	High	Acute
1. Entanglement											-	
1.1 Can any materials become entangled with moving parts of the plant	~				~				>			
2. Crushing												
2.1 Can anyone be crushed due to:		-	-	_		-	-				-	
a. Material falling off plant		~					~				~	
b. Unexpected movement of plant		~					~				~	
c. Lack of capacity for plant to be slowed or stopped		~			~				~			
d. The plant tipping or rolling over		~						~				~
e. Part of the plant collapsing	~						~				~	
f. coming in contact with moving part of the plant during testing, operation etc.		~					~				~	
g. being thrown off or under plant	NA				NA				NA			
h. being trapped between plant & materials or fixed structures		~					~				~	
3. Cutting, Stabbing & Puncturing												
3.1 Can anyone be cut, stabbed or punctured due to:												
a. coming in contact with moving parts of the plant testing, operation etc.	~						~				~	
<ul> <li>coming in contact with sharp/flying objects</li> </ul>	~					~			>			
c. the plant, parts of or work pieces disintegrate	~					~			>			
d. work pieces being ejected	~				~				>			
e. the mobility of the plant		~					~				~	
f. uncontrolled or unexpected movement of plant		~					•				~	

POSSIBLE HAZARD TYPES	LIKEL	IHOOD OF	OCCURR	ENCE	POSS	BLE CC	NSEQUE	NCE		<b>RISK RA</b>	TING	
	Highly Unlikely	Unlikely	Likely	Very Likely	Insignificant	Minor Injury	Major Injury	Extreme	Low	Moderate	High	Acute
4. Shearing			-									
<ul> <li>4.1 Can any body parts be sheared between two parts of the plant</li> <li>5. Friction</li> </ul>	~				~				>			
5.1 Can anyone be burnt due to contact with moving parts or surfaces, or material handled by plant	~				~				>			
6. Striking												
6.1 Can anyone be struck by moving objects due to: a. uncontrolled or unexpected				1			[					
movement of plant		~				~			~			
b. the plant, parts off or work pieces disintegrate		~				~			>			
c. work pieces being ejected	NA											
d. mobility of the plant		✓					~		~		~	
7. High Pressure Fluid												
7.1 Can anyone come into contact with fluids under high pressure, due to plant failure or misuse.		>				~			>			
8. Electrical												
8.1 Can anyone be injured by electrical shock or burnt due to:					-							
a. the plant contacting live electrical conductors	~						>					>
<ul> <li>b. the plant working too close to electrical conductors</li> </ul>	NA				NA				NA			
c. overload of electrical circuits	✓				~				~			
d. damaged or poorly maintained leads and cables	~				~				>			
e. damaged electrical switches	~				~				~			
f. water near electrical equipment	NA				NA				NA			
g. lack of isolation procedures	NA				NA				NA			

Ρ	OSSIBLE HAZARD TYPES	LIKEL	IHOOD OF	OCCURR	ENCE	POSS	IBLE CO	NSEQUE	NCE		<b>RISK RA</b>	TING	
		Highly Unlikely	Unlikely	Likely	Very Likely	Insignificant	Minor Injury	Major Injury	Extreme	Low	Moderate	High	Acute
9.	Explosion		-	-								Ī	
	Can anyone be injured by explosion of gases, vapours, liquids, dusts or other substances, triggered by the operation of the plant or by material handled by the plant. Only if ruptured or stuck services eg. Gas pipeline	NA											
	Slipping, Tripping and ling												
	1 Can anyone using the plant, or in the vicinity of the plant, slip, trip or fall due to:					-							
a.	uneven or slippery work surfaces		~				~			~			
	poor housekeeping, e.g. spillage not cleaned up	N/A											
	obstacles placed in the vicinity of the plant	N/A											
10.	2 Can anyone fall from a height due to:												
a.	lack of a proper platform	N/A											
b.	lack of proper stairs or	>					~			>			
C.	ladders	N/A											
d.	lack of guardrails or other edge protection	N/A											
e.	unprotected holes, penetrations or gaps	N/A											
f.	poor floor or walking surfaces, e.g. slip resistant	N/A											
g.	steep walking surfaces	N/A											
h.	collapse of the supporting structure	N/A											

POSSIBLE HAZARD TYPES LIKELIHOOD OF OCCURRENCE				POSS	POSSIBLE CONSEQUENCE			RISK RATING				
	Highly Unlikely	Unlikely	Likely	Very Likely	Insignificant	Minor Injury	Major Injury	Extreme	Low	Moderate	High	Acute
11. Ergonomic												
11.1 Can anyone be injured due to:											4	
a. poorly designed seating	<b>~</b>				~				~			
b. repetitive body movement		>			~				~			
<ul> <li>c. constrained body posture, e.g. excessive effort</li> </ul>	~				~				~			
d. designed deficiency causing mental stress	~				~				~			

### 12. Other information

How is the plant cleaned?
<ul> <li>In accordance with manufacturer's instructions – (eg water pressure cleaner)</li> </ul>
De mande have (a ha nem could (a class (ha nlaw ()
Do guards have to be removed to clean the plant? No
Are there any reasonably foreseeable abnormal operating conditions? (e.g. jam ups)
- Operating on steep or slippery slopes increases the likelihood of rollover
- Variable road, soil and environmental conditions
- Striking overhead services
Other comments / notes:
Other comments / notes.
- Those hazards which have been given 'High' or 'Acute' risk ratings in this assessment relate to the operation of the plant rather
than to this static risk assessment. For the purposes of the ratings provided, it is assumed that that operators will have appropriate
high level controls in place. These would include only being operated by qualified and competent operators who :
- operate the plant in accordance with the manufacturer's instructions & safe operating procedures
- complete pre-start checklists
- check and continually monitor site conditions for hazards to themselves and bystanders such as pedestrians

# PLANT RISK ASSESSMENT MATRIX

#### Step 1:Determine Likelihood

What is the possibility that the effect will occur?

	Criteria	Description
Almost certain	Expected in most circumstances	Effect is a common result
Very Likely	Will probably occur in most circumstances	Effect is known to have occurred at this site or it has happened
Unlikely	Could occur at some time	Effect is not likely to occur, operators have not heard of it happening
Highly unlikely	May occur only in exceptional circumstances	Effect is practically impossible

#### Step 3: Determine the risk score

		Consequence		
Likelihood	Insignificant	Minor	Major	Extreme
Very Likely	3 High	3 High	4 Acute	4 Acute
Likely	2 Moderate	2 Moderate	4 Acute	4 Acute
Unlikely	1 Low	1 Low	3 High	4 Acute
Highly Unlikely	1 Low	1 Low	3 High	3 High

#### Step 2:Determine Consequence

What will be the ex	pected effect?
---------------------	----------------

Level of Effect	Example of each level
Insignificant/ Acceptable	No effect – or so minor that effect is acceptable
Minor Injury	First Aid treatment only; no lost time injury
Major Injury	Hospital admittance; extensive injuries; lost time injury > 7 days; Permanent Total Disability injury; death
Extreme Injury	Multiple Permanent Total Disability injuries; death or multiple deaths

#### Step 4: Record risk score on worksheet

**Note** – Risk scores have no absolute value and should only be used for comparison and to engender discussion.

Score	Action
4 A: Acute	<b>DO NOT PROCEED.</b> Requires immediate attention. Introduce further high-level controls to lower the risk level. Re-assess before proceeding.
3 H: High	Review before commencing work. Introduce new controls and/or maintain high-level controls to lower the risk level. Monitor frequently to ensure control measures are working.
2 M: Moderate	Maintain control measures. Proceed with operating plant. Monitor and review regularly, or if operating procedures change.
1 L: Low	<b>Record and monitor</b> Proceed with work. Review regularly, and if the plant o safe operating procedures change.
